INTERNAL RISK FACTORS

- 1. Our operations are subject to high working capital requirements. Our inability to maintain an optimal level of working capital required for our business may impact our operations adversely.**

Our business requires significant amount of working capital and major portion of our working capital is utilized towards accounts receivable and inventories.

Our accounts receivable collection cycle is fairly long as a result of the nature of our business and operations. This makes our business more susceptible to market downturns and client credit risk.

Our growing scale and expansion, if any, may result in increase in the quantum of current assets. Seed production requires various raw materials including foundation seeds as well as other key inputs such as pesticides, fertilisers and electricity.

Our accounts receivable as at the end of the Fiscal period 2023, 2022 and 2021 stood at Rs. 1,944.56 Lakhs, Rs. 1,062.16 Lakhs and Rs. 761.55 Lakhs which constituted 51.09%, 36.78% and 37.59% of the total current assets respectively. Also, our inventories as at the end of the Fiscal period 2023, 2022 and 2021 stood at Rs. 1345.03 Lakhs, Rs. 1794.43 Lakhs and Rs. 1241.87 Lakhs which constituted 35.34%, 62.13% and 61.30% of the total current assets respectively.

Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations.

6. *Our business is seasonal in nature and therefore our results of operations for any quarter in a given year may not, therefore, be comparable with other quarters in that year.*

Our business is seasonal in nature and as a result, our operating results may fluctuate. Since our business is influenced by the traditional crop season in India, our production as well as the demand for our products may be affected by seasonal factors such as weather conditions, irrigation facilities, availability of credit to farmers and overall agricultural production. For example, weak rainfall during a particular year may result in lower than normal area under cultivation for certain crops and this may affect overall agricultural production in India. Consequently, the results of one reporting period may not be necessarily comparable with the preceding, succeeding or corresponding reporting periods. Our revenues recorded during planting and harvesting seasons are typically lower as compared to revenues recorded during the periods preceding these crop seasons. During periods of low sales activity, we continue to incur substantial operating expenses in connection with, among other things, product promotion expenses which are not reduced significantly during such periods, while our revenues remain reduced. We also experience significant fluctuations in our working capital requirements during the planting and harvesting cycles.

We have experienced, and expect to continue to experience, significant variability in our total revenue, operating cash flows, operating expenses and net revenues on a quarterly basis. In particular, our sales during the first quarter i.e., between the months of April and June, are significantly greater than sales recorded during any other quarterly period as sale of groundnut seeds and other kharif season crops are generally shown during this period. Similarly, our sales during the first half (i.e., between the months of April and September) are significantly greater than our sales during the second half (i.e., between the months of October and March). The seasonality of our business and its impact may cause fluctuations in our result of operations and financial conditions.

7. *Our inability to predict accurately the demand for our products and to manage our production and inventory levels could materially and adversely affect our business, financial condition, results of operations and prospects.*

We sell our seed products primarily to dealers, who in turn sell the products primarily to farmers, who are our end consumers. We monitor our inventory levels at different stages of our supply chain based on our own estimates of future demand for our products. Because of the length of time necessary to produce commercial quantities of seeds, we are typically required to make production decisions a year in advance of sales. Our end consumers generally make purchasing decisions for our products based on market prices, economic and weather or climatic conditions and certain other factors that we or our dealers may not be able to anticipate accurately in advance. Demand for our products may also be affected by factors such as irrigation facilities, availability of credit, overall agricultural production, farmers' ability to generate income from their produce. Any negative change in preferences of our end consumers for our products could result in reduced demand for our products.

An inaccurate forecast of demand for any of our products can result in the unavailability of seeds that are in high demand, which may adversely affect our results of operations, customer relationships and market share. Conversely, an inaccurate forecast of demand or return of our products can also result in a surplus of seeds, which may increase storage and other related costs, negatively impact cash flows, reduce the quality of inventory, erode margins substantially and may ultimately result in write-offs of inventory, any of which circumstances could materially and adversely affect our business, financial condition, results of operations and prospects. These factors could result in lower revenue or operating margins and in turn, materially and adversely affect our business, financial condition, results of operations and prospects.

8. *Substantial portion of our revenues has been dependent upon few customers and dealers. The loss of any one or more of our major customers or dealers would have a material adverse effect on our business, cash flows, results of operations and financial condition.*

As per our current nature of business model, our company generate majority of our revenue from top 5 Customers and dealers. Top five customers and dealer of our company for the period ended on September 30, 2023 contributed for 9,54,79,562 (22.57% of Total Revenue) while for the financial year ended 2022-23, 2021-22 and 2020-21 contributed for 12,91,25,100/- (19.77% of Total Revenue), 11,42,20,521/- (17.61% of Total Revenue), 4,80,44,838/- (8.93% of Total Revenue) respectively for all three years of our sales. Although, we believe that we will not face substantial challenges in maintaining our business relationship with them or finding new customers or dealers, we cannot assure that we shall generate the same quantum of business, or any business at all, and the loss of business from one or more of them may adversely affect our revenue and operations. However, the composition and revenue generated from their customers might change as we continue to add new customers in the normal course of business.

The details of the same is mentioned in the table below:

Particulars	September 30, 2023	March 31, 2023	March 31, 2022	March 31, 2021
Top 1 Customers (%)	12.12%	7.16%	10.65%	3.28%
Top 3 Customers (%)	18.24%	8.82%	12.12%	4.71%
Top 5 Customers (%)	22.57%	19.77%	17.61%	8.93%

In addition, we are exposed to payment delays and/or defaults by our major customers or dealer and our financial position and financial performance are dependent on the creditworthiness of our customers. There is no guarantee that all or any of our customers or dealers will honor their outstanding amounts in time and whether they will be able to fulfill their obligations, due to any financial difficulties, cash flow difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur from all or any of our major customer, our financial performance and our operating cash flows may be adversely affected.

9. *Term Loans availed by Our Company have been secured on personal guarantees of our Directors and create charge over our immovable and movable properties in respect of finance availed by us.*

We have secured our lenders by creating a charge over our movable and immovable properties in respect of Term Loan & working loan availed by us from lenders. Our Promoters Ms. Ilaben Paresbhai Patel, Mr. Ketankumar Babulal Suvagiya, Mr. Maheshbhai Sibabhai Gajera, Mr. Shivilal Veljibhai Bhanderi, Mr. Kalubhai Maganbhai Vekariya, Mr. Bharatbhai Sibabhai Gajera & Mr. Dineshbhai Madhabhai Suvagiya have provided personal guarantee to secure a significant portion of our existing borrowings taken from the banks and may continue to provide such guarantees and other security post listing. In case of a default under our loan agreements, any of the personal/corporate guarantees provided by the aforesaid may be invoked which could negatively impact their reputation and net worth. Also, we may face certain impediments in taking decisions in relation to our Company, which in turn would result in a material adverse effect on our financial condition, business, results of operations and prospects and would negatively impact our reputation.

We have secured loan/Credit Facilities outstanding debt of ₹2760.42 Lakhs as on September 30, 2023 and we have secured our lenders by creating charge over our movable and immovable properties. In the event we default in repayment of the loans availed by us and any interest thereof, our properties may be forfeited by lenders.

For further information on the financing and loan agreements along with the total amounts outstanding and the details of the repayment schedule, please refer to chapter "Statement of Financial Indebtedness" beginning on page 230 of this Prospectus.

It cannot be assured, that there will not be such instance in the future, or our company will not commit any further delays or defaults in relation to its statutory filing requirements, or any penalty or fine will not be imposed by any regulatory authority in respect to the same. The happening of such event may cause a material effect on our financial results and operational position.

- 11. *We rely on third-party farmers who assist us in growing seeds (the “Seed Growing Farmers”) to produce our seeds, and any problems with such Seed Growing Farmers may negatively affect our sales, cash flows from operations and results of operations, and may further expose us to reputational risk.***

We generally undertake our seed production through contractual arrangements with certain selected Seed Growing Farmers during every crop season. We provide these Seed Growing Farmers with the required farm inputs and closely manage their activities during all stages of seed production. However, our arrangements with these Seed Growing Farmers carry risks that they may have economic or other interests that are inconsistent with our interests. They may take actions that are contrary to our instructions or requests, or may be unable or unwilling to fulfill their obligations, especially those that relate to timely delivery of the produce. Under the provisions of the Protection of Plant Varieties and Farmers’ Rights Act, 2001 (the “PPV & FR Act”), farmers may be entitled to statutory protection, thereby enabling farmers to save, use, sow, re-sow, exchange, share or sell their farm produce in any manner they want and we may not be able to enforce provisions in our agreements with such Seed Growing Farmers to restrict them from doing so. Further, any failure by us to monitor closely the activities of our Seed Growing Farmers could expose our crops to risks related to genetic contamination, disease or pest infestation and other types of problems that could affect the quality of our seeds. While we have had long-term relationships with several of our Seed Growing Farmers who are now familiar with our quality standards and other parameters, we do not have long-term contracts with our Seed Growing Farmers and cannot assure you that such Seed Growing Farmers will continue to work with us on expiry of the relevant contract period.

- 12. *We are heavily dependent on our Promoters and Key Managerial Personnel for the continued success of our business through their continuing services and strategic guidance and support.***

Our success heavily depends upon the continued services of our Promoters and Key managerial personnel, particularly, Mr. Ashokbhai Sibabhai Gajera, Mr. Dineshbhai Madhabhai Suvagiya and Mr. Bharatbhai Sibabhai Gajera. We also depend significantly on our Key Managerial Persons for executing our day to day activities. The loss of any of our Promoter and Key Management Personnel, or failure to recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy. For further details of our Directors and key managerial personnel, please refer to Section “Our Management” on page 158 of this Prospectus.

- 13. *We have incurred indebtedness which exposes us to various risks which may have an adverse effect on our business and results of operations.***

Our ability to borrow and the terms of our borrowings will depend on our financial condition, the stability of our cash flows, general market conditions, economic and political conditions in the markets where we operate and our capacity to service debt. As on September 30, 2023, our total outstanding indebtedness was ₹ 2906.38 lakhs, out of which 2760.41 Lakhs was secured and balance of Rs.102.45 Lakhs unsecured.

Our significant indebtedness in future may result in substantial amount of debt service obligations which could lead to:

1. Increasing our vulnerability to general adverse economic, industry and competitive conditions;
2. Limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
3. Affecting our credit rating;
4. Limiting our ability to borrow more money both now and in the future; and
5. Increasing our interest expenditure and adversely affecting our profitability.

If the loans are recalled on a short notice, we may be required to arrange for funds to fulfil the necessary requirements. The occurrence of these events may have an adverse effect on our cash flow and financial conditions of the company. For further details regarding our indebtedness, see “Statement of Financial Indebtedness” on page no. 230 of this Prospectus.

14. *Weather conditions, crop diseases and pest attacks could adversely affect the production of our seed products, as well as the demand for our seed products, which may adversely affect our business, financial condition, results of operations and prospects.*

Our seed production activities and the Indian seeds industry are subject to substantially all the risks faced by the agriculture industry in India. Crop yields depend significantly on the absence of any crop disease or pest attacks and favourable weather conditions such as adequate rainfall and temperature, which vary from location to location. Adverse weather conditions such as windstorms, flood, drought or frost may cause crop failures and reduce harvests, which may adversely affect our operations. However, results of changes in weather and climatic conditions are difficult to predict and may affect crop planning and timing. In addition to factors such as soil quality and the use of fertilisers, weather conditions may also affect the presence of diseases and pests. Any of these factors may adversely affect our production of seeds. As we are obliged to pay our Seed Growing Farmers a mutually agreed compensation regardless of the seed yield, we bear the risks associated with bad weather and climatic conditions. Furthermore, if crop diseases and pests develop resistance to our products, this could adversely affect our Seed Growing Farmers’ crop yields. Additionally, we cannot assure you that adverse weather patterns in the future or potential crop diseases will not affect our ability to produce the desired quality or quantity of products to meet demand and in turn, their pricing. Any of these factors, or a combination thereof, can adversely affect the quality of our seeds, yield and inventory levels, could increase our cost of operations, strain our operating margins and reduce our operating revenue, which could materially and adversely affect our business, financial condition, results of operations and prospects.

15. *Actual or alleged claims relating to defective or low-quality products could materially and adversely affect our business, financial condition, results of operations, reputation and prospects.*

Although our seeds undergo extensive quality checks, they may still contain defective or undesired characteristics that may be difficult to detect prior to their sale and use. Further, our seeds may be subject to contamination by external sources over which we may have little, if any, or no control. In particular, we have limited control of the handling and storage of our seed products once these products have been sold to our dealers and farmers. Any defects in our products, whether through our own fault or the fault of a third party, such as a dealers, could result in losses to farmers, which may include the value of lost crops and any claims for such losses could greatly exceed the value of the seeds that we sell, and could adversely affect our market reputation.

Further, the Seeds Act 1966, the Seeds Rules 1968 and the Seeds (Control) Order 1983 (the “Central Seeds Statutes”) prescribe stringent standards in relation to the quality and reliability of seeds, which are implemented and enforced by various central or state government authorities. Although we believe we

take appropriate storage and handling precautions, our seeds are biological products which may deteriorate naturally over time as a result of natural biological processes. In the event the seeds sold by us or by our dealers are defective, contaminated or substandard for any reason, including due to human errors at any stage of seed processing or conditioning, a large number of farmers may experience crop failures and government or regulatory authorities, individual farmers and other representative groups may pursue claims or actions against us.

- 16. *We have in the past entered into related party transactions and may continue to do so in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our Company's financial condition and results of operations.***

Our Company has entered into various transactions with our Directors, Group companies, Promoters and Promoter Group members/entities. These transactions, inter-alia includes, sales, purchase, remuneration and loans and advances etc.

We have entered into certain transactions with related parties and are likely to continue to do so in the future. The market for our products is competitive on account of existence of both the organized and unorganized players. Competition occurs generally on the key attributes such as quality of products, distribution network, pricing and timely delivery. Transportation strikes could have an adverse effect on our receipt of raw materials and our ability to deliver our products to our customers. In addition, transportation costs in India have been steadily increasing over the past several years. Continuing increases in transportation costs or unavailability of transportation services for our products may have an adverse effect on our business, financial condition, results of operations and prospects.

For this purpose, we hire services of transportation companies. However, we have not entered into any definitive agreements with any third-party transport service providers and engage them on a needs basis. In addition, any delay or failure on our part to supply the required quantity or quality of products, within the time stipulated by our agreements, to our customers may in turn cause delay in payment or refusal of payment by the customer. Such defaults/delays by our customers in meeting their payment obligations to us may have a material effect on our business, financial condition and results of operations.

28. *Failure to effectively manage labour/staff or failure to ensure availability of sufficient labour/staff could affect the business operations of the Company.*

Our business activities are dependent on availability of skilled and unskilled labour/staff. Non-availability of labour or staff at any time or any disputes with them may affect our production schedule and timely delivery of our products to customers which may adversely affect our business and result of operations. Though we have not faced any labour/staff problem in the past we cannot assure that we will not experience disruptions to our operations due to disputes or other problems with our work force, which may lead to strikes, lock- outs or increased wage demands. Such issues could have adverse affect on our business, and results of operations.

29. *The Promoters (including family Member of Promoters) and Directors hold 100% of the Equity Shares of Our Company and are therefore interested in the Company's performance in addition to their remuneration and reimbursement of expenses.*

as shareholders to the benefit and best interest of our Company. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

31. *We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule.*

The proposed fund requirement for funding working capital requirements, as detailed in the section titled “Objects of the Issue” is to be funded from the proceeds of this Issue. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the Chapter titled “Objects of the Issue” beginning on page no. 85 of this Prospectus.

32. *We may not be able to sustain effective implementation of our business and growth strategy.*

The success of our business will largely depend on our ability to effectively implement our business and growth strategy. In the past we have generally been successful in execution of our business but there can be no assurance that we will be able to execute our strategy on time and within the estimated budget in the future. If we are unable to implement our business and growth strategy, this may have an adverse effect on our business, financial condition and results of operations.

33. *We are subject to the restrictive covenants of banks in respect of the Loans/ Credit Limits and other banking facilities availed from them.*

Our financing arrangements contain restrictive covenants whereby we are required to obtain approval from our lender, regarding, among other things such as major changes in share capital, management, changes in fixed assets, creation of any other charge, undertake any guarantee obligation etc. There can be no assurance that such consents will be granted or that we will be able to comply with the financial covenants under our financing arrangements. In the event we breach any financial or other covenants contained in any of our financing arrangements, we may be required under the terms of such financing arrangements to immediately repay our borrowings either in whole or in part, together with any related costs. This may adversely impact our results of operations and cash flows. For further details on the Cash Credit Limits and other banking facilities, please see “Statement of Financial Indebtedness” on page no. 230 of the Prospectus.

34. *Any Penalty or demand raised by statutory authorities in future will affect our financial position of the Company.*

Our Company is engaged in business of agriculture seeds which attracts tax liability such as Goods and Service Tax, Income Tax as per the applicable provisions of Law. Currently we are not required to get registration under the labour laws like Provident Fund and ESI but in future we may be subjected to deposit of Provident Fund and ESI contribution of employees. However, we have deposited the required returns under various applicable Acts but any demand or penalty raised by the concerned authority in future for any previous year and current year will affect the financial position of the Company.

35. *The Objects of the Issue for which funds are being raised, are based on our management estimates and have not been appraised by any bank or financial institution or any independent agency.*

The deployment of funds will be entirely at our discretion, based on the parameters as mentioned in the chapter titled "Objects of the Issue". The fund requirement and deployment, as mentioned in the "Objects of the Issue" on page no. 85 of this Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter "Objects of the Issue" is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter "Objects of the Issue" will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

36. *Our ability to pay any dividends will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our Dividend history refer to the Section "Dividend Policy" on page no. 187 of the Prospectus.

37. *There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.*

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above Rs. 10,000.00 Lacs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

38. *We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.*

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the IPO Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favourable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favour of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company's Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company's Equity Shares. Additionally the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

39. *Certain data mentioned in this Prospectus has not been independently verified*

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

40. *We may not be able to sustain effective implementation of our business and growth strategies.*

The success of our business will depend greatly on our ability to effectively implement our business and growth strategies. We may not be able to execute our strategies in the future. Further, our growth strategies could place significant demand on our management team and other resources and would require us to continuously develop and improve our operational, financial and other controls, none of which can be assured. Any failure on our part to scale up our infrastructure and management could cause disruptions to our business and could be detrimental to our long-term business outlook. Further, we operate in a highly dynamic industry, and on account of changes in market conditions, industry dynamics, technological improvements or changes and any other relevant factors, our growth strategy

and plans may undergo changes or modifications, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands. Our inability to implement our business strategies and sustain our growth may impair our financial growth and thus result in an adverse impact on our Company's share price.

41. *In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects / schedule of implementation of this Issue which would in turn affect our revenues and results of operations.*

The funds that we receive would be utilized for the Objects of the Issue as has been stated in the Chapter "Objects of the Issue" on page no.85 of the Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management's estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business, development and working capital plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

42. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchanges which require us to file unaudited financial results on a half yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

RISK FACTORS RELATED TO EQUITY SHARES

44. *The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue.*

The Issue price based on numerous factors and may not be indicative of the market price for our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. There can be no assurance that you will be able to resell your Shares at or above the Issue Price. Among the factors that could affect our Share price are: quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net profit and income; changes in income or earnings estimates or publication of research reports by analysts; speculation in the press or investment community; general market conditions; and domestic and international economic, legal and regulatory factors unrelated to our performance.

45. *The Equity Shares issued pursuant to the Issue may not be listed on the Stock Exchange(s) in a timely manner, or at all, and any trading closures at the Stock Exchange(s) may adversely affect the trading price of our Equity Shares.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorising the issuing of Equity Shares to be submitted and there could therefore be a failure or delay in listing the Equity Shares on the Stock Exchanges. Any failure or delay in obtaining such approval would restrict your ability to dispose of your Equity Shares.

The regulation and monitoring of Indian securities markets and the activities of investors, brokers and other participants differ, in some cases significantly, from those in developed economies. The Stock Exchanges have in the past experienced problems, including temporary exchange closures, broker defaults, settlements delays and strikes by brokerage firm employees, which, if continuing or recurring, could affect the market price and liquidity of the securities of Indian companies, including the Equity Shares, in both domestic and international markets. A closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of the Equity Shares.

46. *Any further issuance of Equity Shares by our Company or sales of Equity Shares by any significant shareholders may adversely affect the trading price of the Equity Shares.*

Any future issuance of Equity Shares by our Company could dilute the investors' shareholding. Any such future issuance of Equity Shares or sales of Equity Shares by any of our significant shareholders may also adversely affect the trading price of the Equity Shares, and could impact our ability to raise capital through an offering of securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares.

47. *There is no existing market for our Equity Shares, and we do not know if one will develop. Our stock price may be highly volatile after the Issue and, as a result, you could lose a significant portion or all of your investment.*

There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all and any trading closures at the Stock Exchanges may adversely affect the trading price of our Equity Shares. Prior to the Issue, there has not been a public market for the Equity Shares. Further, we cannot predict the extent to which investor interest will lead to the development of an active trading market on the Stock Exchanges or how liquid that market will become. If an active market does not develop, you may experience difficulty selling the Equity Shares that you purchased. The Issue Price is not indicative of prices that will prevail in the open market following the Issue. Consequently, you may not be able to

sell your Equity Shares at prices equal to or greater than the Issue Price. The market price of the Equity Shares on the Stock Exchanges may fluctuate after listing as a result of several factors, including the following:

- Volatility in the Indian and other Global Securities Markets;
- The performance of the Indian and Global Economy;
- Risks relating to our business and industry, including those discussed in this Prospectus;
- Strategic actions by us or our competitors;
- Investor perception of the investment opportunity associated with the Equity Shares and our future performance;
- Adverse media reports about us, our shareholders or Group Companies;
- Future sales of the Equity Shares;
- Variations in our half-yearly results of operations;
- Differences between our actual financial and operating results and those expected by investors and analysts;
- Our future expansion plans;
- Perceptions about our future performance or the performance of Power (Transmission and Distribution) companies generally;
- Performance of our competitors in the Power (Transmission and Distribution) industry and the perception in the market about investments in the Trading sector;
- Significant developments in the regulation of the trading and distribute ion industry in our key trade locations;
- Changes in the estimates of our performance or recommendations by financial analysts;
- Significant developments in India's economic liberalisation and deregulation policies; and
- Significant developments in India's fiscal and environmental regulations. There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share.

Price could fluctuate significantly as a result of market volatility. A decrease in the market price of the Equity Shares could cause you to lose some or all of your investment.

- 48. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, the Equity Shares at a particular point in time.***

The price of the Equity Shares will be subject to a daily circuit breaker imposed by all stock exchanges in India which does not allow transactions beyond a certain level of volatility in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by the SEBI on Indian stock exchanges. The percentage limit on our circuit breaker is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker from time to time, and may change it without our knowledge. This circuit breaker effectively limits upward and downward movements in the price of the Equity Shares. As a result, shareholders' ability to sell the Equity Shares, or the price at which they can sell the Equity Shares, may be adversely affected at a particular point in time.

- 49. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.***

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realised on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India, upto an amount of ₹ 1 lakh, if Securities Transaction Tax ("STT") has been paid on the transaction. STT will be

levied on and collected by a domestic stock exchange on which the equity shares are sold. Any gain realised on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. In addition, changes in the terms of tax treaties or in their interpretation, as a result of renegotiations or otherwise, may affect the tax treatment of capital gains arising from a sale of Equity Shares.

EXTERNAL RISK FACTORS

50. *The extent to which the Coronavirus disease (COVID-19) may affect our business and operations in the future is uncertain and cannot be predicted*

During the first half of calendar year 2020, COVID-19 spread to a majority of countries across the world, including India. The COVID-19 pandemic has had, and may continue to have, significant repercussions across local, national and global economies and financial markets. In particular, a number of governments and organizations have revised GDP growth forecasts for calendar year 2020 downward in response to the economic slowdown caused by the spread of COVID-19. The global impact of the COVID-19 pandemic has been rapidly evolving and public health officials and governmental authorities have responded by taking measures, such as prohibiting people from assembling in large numbers, instituting quarantines, restricting travel, issuing "stay-at-home" orders and restricting the types of businesses that may continue to operate, among many others. On March 14, 2020, India declared COVID-19 as a "notified disaster" and imposed a nationwide lockdown beginning on March 25, 2020. The lockdown lasted until May 31, 2020, and has been extended periodically by varying degrees by state governments and local administrations. The lifting of the lockdown across various regions has been regulated with limited and progressive relaxations being granted for movement of goods and people in other places and calibrated re-opening of businesses and offices. Despite the lifting of the lockdown, there is significant uncertainty regarding the duration and long-term impact of the COVID-19 pandemic, as well as possible future responses by the Government, which makes it impossible for us to predict with certainty the impact that COVID-19 will have on our business and operations in the future. We are closely monitoring the impact of COVID-19 on our financial condition, liquidity, operations, suppliers and workforce. Any intensification of the COVID-19 pandemic or any future outbreak of another highly infectious or contagious disease may adversely affect our business, results of operations and financial condition.

51. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Famine, War, Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, famine, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Our operations may be adversely affected by natural disasters and/or severe weather conditions, which can result in damage to our seeds inventory and hamper our productivity and may slow down our business operations temporarily or any other factor, which can adversely affect agriculture market in which we operate. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative

impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

In addition, India has witnessed local civil disturbances in recent years, in particular communal violence across ethnic or communal lines involving conflicts, riots and other forms of violence between communities of different religious faith or ethnic origins, and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

52. *The Companies Act, 2013 has effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs*

A majority of the provisions and rules under the Companies Act, 2013 have been notified and have come into effect from the date of their respective notification, resulting in the corresponding provisions of the Companies Act, 1956 ceasing to have effect. The Companies Act, 2013, and amendments there to, has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital, disclosures in prospectus, corporate governance norms, audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in forward dealing. Further, companies meeting certain financial thresholds are also required to constitute a committee of the board of directors for corporate social responsibility activities and ensure that at least 2% of the average net profits of the company during three immediately preceding financial years are utilized for corporate social responsibility activities. Penalties for instances of non-compliance have been prescribed under the Companies Act, 2013, which may result in inter alia, our Company, Directors and key managerial employees being subject to such penalties and formal actions as prescribed under the Companies Act, 2013, should we not be able to comply with the provisions of the New Companies Act within the prescribed timelines, and this could also affect our reputation.

To ensure compliance with the requirements of the Companies Act, 2013 within the prescribed timelines, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention. While we shall endeavour to comply with the prescribed framework and procedures, we may not be in a position to do so in a timely manner.

The Companies Act, 2013 introduced certain additional requirements which do not have corresponding equivalents under the Companies Act, 1956. Accordingly, we may face challenges in interpreting and complying with such provisions due to limited jurisprudence on them. In the event, our interpretation of such provisions of the Companies Act, 2013 differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps. Additionally, some of the provisions of the Companies Act, 2013 overlap with other existing laws and regulations (such as the corporate governance norms and insider trading regulations). We may face difficulties in complying with any such overlapping requirements. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

53. *Environmental and safety regulations impose additional costs and may affect our Company's results of operations.*

Our Suppliers are subject to various central, state and local environmental and safety laws, concerning issues such as harm caused by air or waste water emission and the investigation and contamination. While we believe that our suppliers are currently in compliance with all material respects with applicable environmental laws and regulations, additional costs and liabilities related to compliance with these laws and regulations are an inherent part of their business. Further, while they currently intend to continue to comply with applicable environmental legislation and regulatory requirements, any changes in the applicable laws and regulations in the future may create substantial environmental compliance or remediation liabilities and costs, including monetary fines, criminal penalties on our Suppliers for violation of applicable laws, or imposition of restrictions on our Suppliers operations (which may include temporary suspension or closure of its operations). This may also increase our Company's cost and affect our revenues in the future.

54. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, financial condition, results of operations and prospects.*

Our business and financial performance could be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business. Please refer to "Key Industry Regulations and Policies" on page no.144 of this Prospectus for details of the laws currently applicable to us. There can be no assurance that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the jurisdictions in which we operate may have a material adverse effect on our business, financial condition and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. Any unfavourable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

GST has been implemented with effect from July 1, 2017 and has replaced the indirect taxes on goods and services such as central excise duty, service tax, central sales tax, state VAT and surcharge currently being collected by the central and state governments. The GST is expected to increase tax incidence and administrative compliance. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

Further, the general anti avoidance rules ("GAAR") provisions have been made effective from assessment year 2018-19 onwards, i.e.; financial Year 2017-18 onwards and the same may get triggered once transactions are undertaken to avoid tax. The consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences.

In the absence of any precedents on the subject, the application of these provisions is uncertain. The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. If such tax laws, rules and regulations are amended, new adverse laws, rules or regulations are adopted or current laws are interpreted adversely to our interests, the results could increase our tax payments (prospectively or retrospectively) and/or

subject us to penalties. Further, changes in capital gains tax or tax on capital market transactions or sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

- 55. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.***

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

- 56. *Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance***

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities in India or any region of our trade may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

- 57. *Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.***

Terrorist attacks and other acts of violence or war in any region of our trade may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business. In addition, any deterioration in relations between India and Pakistan might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares.

India, Africa and Middle East are regions that have witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other \ adverse social, economic and political events in any such region could have a negative impact on the value of business and eventually the price of our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

- 58. *Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors' assessments of Our Company's financial condition. Our failure to successfully adopt IFRS may have an adverse effect on the price of our Equity Shares. The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.***

Our financial statements, including the financial statements provided in this Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Prospectus, nor do we provide a reconciliation of our financial

statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. Accordingly, the degree to which the Indian GAAP financial statements included in this Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Prospectus should accordingly be limited.

India has decided to adopt the "Convergence of its existing standards with IFRS" and not the "International Financial Reporting Standards" ("IFRS"), which was announced by the MCA, through the press note dated January 22, 2010. These "IFRS based / synchronized Accounting Standards" are referred to in India as IND (AS). Public companies in India, including our Company, may be required to prepare annual and interim financial statements under IND (AS). The MCA, through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues, including tax related issues, are resolved. Further, MCA Notification dated February 16, 2015, has provided an exemption to the Companies proposing to list their shares on the SME Exchange as per Chapter IX of the SEBI ICDR Regulations and hence the adoption of IND (AS) by a SME exchange listed company is voluntary. Accordingly, we have made no attempt to quantify or identify the impact of the differences between Indian GAAP and IFRS or to quantify the impact of the difference between Indian GAAP and IFRS as applied to its financial statements. There can be no assurance that the adoption of IND-AS will not affect our reported results of operations or financial condition. Any failure to successfully adopt IND-AS may have an adverse effect on the trading price of our Equity Shares. Currently, it is not possible to quantify whether our financial results will vary significantly due to the convergence to IND (AS), given that the accounting principles laid down in the IND (AS) are to be applied to transactions and balances carried in books of accounts as on the date of the applicability of the converged standards (i.e., IND (AS)) and for future periods.

Moreover, if we volunteer for transition to IND (AS) reporting, the same may be hampered by increasing competition and increased costs for the relatively small number of IND (AS)-experienced accounting personnel available as more Indian companies begin to prepare IND (AS) financial statements. Any of these factors relating to the use of converged Indian Accounting Standards may adversely affect our financial condition.

59. *Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our Company's business*

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our Company's ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could harm our Company's business and financial performance and ability to obtain financing for capital expenditures.

60. *Conditions in the Indian securities market and stock exchanges may affect the price and liquidity of our Equity Shares.*

Indian stock exchanges, which are smaller and more volatile than stock markets in developed economies, have in the past, experienced problems which have affected the prices and liquidity of listed securities of Indian companies. These problems include temporary exchange closures to manage extreme market volatility, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time-to-time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and

liquidity of the Equity Shares could be adversely affected. Further, a closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of our Equity Shares.

GLOBAL ECONOMIC OVERVIEW

Today the world economy at one side is showing signs of recovery from COVID-19 pandemic and on the other side it is facing the uncertainty of Russia- Ukraine war. The global recovery from the COVID-19 pandemic and Russia's invasion of Ukraine is slowing amid widening divergences among economic sectors and regions. The World Health Organization (WHO) announced in May that it no longer considers COVID-19 to be a "global health emergency." Supply chains have largely recovered, and shipping costs and suppliers' delivery times are back to pre-pandemic levels. On the inflation front, it remains high and continues to erode household purchasing power. Policy tightening by central banks in response to inflation has raised the cost of borrowing, constraining economic activity. Immediate concerns about the health of the banking sector have subsided, but high interest rates are filtering through the financial system, and banks in advanced economies have significantly tightened lending standards, curtailing the supply of credit. The impact of higher interest rates extends to public finances, especially in poorer countries grappling with elevated debt costs, constraining room for priority investments. As a result, output losses compared with pre-pandemic forecasts remain large, especially for the world's poorest nations

(Source: World Economic update, Near Term Resilience Persistent Challenges July 2023)

Global Economic also witnessed failures of banks. The unexpected failures of two specialized regional banks in the United States in mid-March 2023 and the collapse of confidence in Credit Suisse—a globally significant bank—have roiled financial markets, with bank depositors and investors reevaluating the safety of their holdings and shifting away from institutions and investments perceived as vulnerable. The loss of confidence in Credit Suisse resulted in a brokered takeover. Broad equity indices across major markets have fallen below their levels prior to the turmoil, but bank equities have come under extreme pressure.

Despite strong policy actions to support the banking sector and reassure markets, some depositors and investors have become highly sensitive to any news, as they struggle to discern the breadth of vulnerabilities across banks and nonbank financial institutions and their implications for the likely near-term path of the

economy. Financial conditions have tightened, which is likely to entail lower lending and activity if they persist

With the recent increase in financial market volatility and multiple indicators pointing in different directions, the fog around the world economic outlook has thickened. Uncertainty is high, and the balance of risks has shifted firmly to the downside so long as the financial sector remains unsettled. The major forces that affected the world in 2022—central banks’ tight monetary stances to allay inflation, limited fiscal buffers to absorb shocks amid historically high debt levels, commodity price spikes and geoeconomic fragmentation with Russia’s war in Ukraine, and China’s economic reopening—seem likely to continue into 2023. But these forces are now overlaid by and interacting with new financial stability concerns. A hard landing— particularly for advanced economies—has become a much larger risk. Policymakers may face difficult trade-offs to bring sticky inflation down and maintain growth while also preserving financial stability

Baseline Scenario

The baseline forecast is for global output growth, estimated at 3.4 percent in 2022, to fall to 2.8 percent in 2023, 0.1 percentage point lower than predicted in the January 2023 WEO before rising to 3.0 percent in 2024. This forecast for the coming years is well below what was expected before the onset of the adverse shocks since early 2022. Compared with the January 2022 WEO Update forecast, global growth in 2023 is 1.0 percentage point lower, and this growth gap is expected to close only gradually in the coming two years which is shown in graph below.

Economic Prospects

For emerging market and developing economies, economic prospects are on average stronger than for advanced economies, but these prospects vary more widely across regions. On average, growth is expected to be 3.9 percent in 2023 and to rise to 4.2 percent in 2024. The forecast for 2023 is modestly lower (by 0.1 percentage point) than in the January 2023 WEO Update and significantly below the 4.7 percent forecast of January 2022. In low-income developing countries, GDP is expected to grow by 5.1 percent, on average, over 2023–24, but projected per capita income growth averages only 2.8 percent during 2023–24, below the average

for middle-income economies (3.2 percent) and so below the path needed for standards of living to converge with those in middle-income economies.

(Source: World Economic outlook, A Rocky Recovery, April-2023, IMP)

Inflation

Inflation is one of the key factors in economic study, the baseline forecast is for global headline (consumer price index) inflation to decline from 8.7 percent in 2022 to 7.0 percent in 2023. This forecast is higher (by 0.4 percentage point) than that of January 2023 but nearly double the January 2022 forecast. Disinflation is expected in all major country groups, with about 76 percent of economies expected to experience lower headline inflation in 2023. Initial differences in the level of inflation between advanced economies and emerging market and developing economies are, however, expected to persist. The projected disinflation reflects declining fuel and nonfuel commodity prices as well as the expected cooling effects of monetary tightening on economic activity. At the same time, inflation excluding that for food and energy is expected to decline globally much more gradually in 2023: by only 0.2 percentage point, to 6.2 percent, reflecting the aforementioned stickiness of underlying inflation. This forecast is higher (by 0.5 percentage point) than that of January 2023.

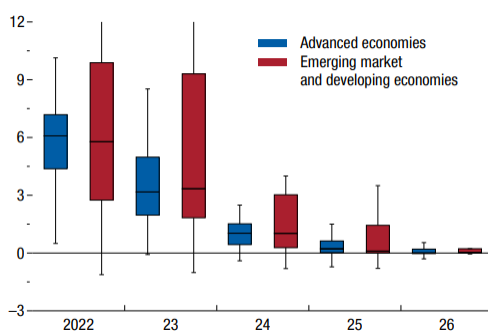

(Source: World Economic outlook, A Rocky Recovery, April-2023, IMP)

Central banks around the world are frantically dancing to the tune of inflation, which seems to be coming under control, although is still far from being tamed completely. Between the three major central banks – the US Federal Reserve (Fed), the European Central Bank (ECB), and the Bank of England (BoE) – the policy rates have been raised by 1440 bps within a span of 18 months. Yet, the 12-month average inflation after the first policy rate hike is significantly higher than the 12-month average inflation prior to the hike in these countries. Instead, liquidity conditions have tightened too quickly in countries that had ultra-loose monetary policies for over a decade. Since these countries also host a large share of global investors, such an aggressive measure has unnerved the sentiments, leading to capital outflows from emerging countries.

Trends in Oil Price:

Global crude oil prices have been trending down over the past few weeks owing to increased oil flows from Russia into the global markets, rising US production, and concerns over oil demand amid a weak economic outlook this year. This is despite the two cuts in oil production by the Organization of the Petroleum Exporting Countries (OPEC) nations since October 2022. Crude prices have been shed more than 40% as of June 2023 since the Russian invasion of Ukraine in February 2022. While WTI fell below US\$70 per barrel this week (US\$67.1 per barrel on June 12) before going up again, Brent prices have hovered around US\$75 per barrel. To reverse this trend, Saudi Arabia, the top producer in the OPEC cartel, has recently unanimously decided to cut production by another one million barrels per day from July and further limit the supply in 2024. These measures will likely keep prices volatile for a while, although the short-term outlook seems to be bearish.

INDIAN ECONOMY OVERVIEW

While the world is still in the woods, the probability of a recession this year has trimmed. Labor markets in several advanced countries remain tight, while the largest economy, the United States, is seeing a rebound in consumer confidence and spending. Risk spreads are declining on both sides of the Atlantic after the recent banking crisis in the United States.

India GDP Growth:

India, meanwhile, enjoys a Goldilocks moment as it sees its economic activity gaining momentum amid continuing global uncertainties. The last quarter's GDP data was pleasantly surprising but not completely unexpected. The GDP growth in the fourth quarter has pushed up the full-year GDP growth of FY2022–23 to 7.2%, 200 basis points (bps) higher than the earlier estimate. The recently released Annual Economic Review for the month of May 2023 highlighted that the post pandemic quarterly trajectories of consumption and investment have crossed pre pandemic levels.

India grew by 6.1% in the last quarter of FY 2022-23, which is approximately ~100 bps higher than what the market had anticipated. While the overall growth was broad-based, many sectors such as construction and agriculture experienced more-than-expected growth. In fact, strong growth in manufacturing proved to be a reassuring development as modest growth in the sector in previous quarters had been a concern for policymakers.

India Import & Export data:

On the expenditure side, exports performed well despite global headwinds, while imports recorded their slowest growth since December 2020, primarily because of easing crude oil prices bringing down India's import bills. Private consumption, the largest component of India's final demand, with a modest growth of 7.5% in FY2022–23, emerged as the weakest link in overall growth. The share of private consumption in GDP fell in the last quarter and was the lowest in the past seven quarters, dragged down by weak rural demand. However, things might be changing on that front as well.

The first-quarter data of FY2024 instils confidence in the improving health of the economy. Inflation in the first quarter was 4.5%, the lowest since the quarter of September 2019. Goods and Services Tax collections remain strong, suggesting that revenue buoyancy will aid in improving the budgeted fiscal deficit ratio to GDP. At the same time, India’s external account has been improving, thanks to the falling import bills as oil prices ease.

(Source: India Economic Outlook, July 2023, Deloitte insights,)

Interestingly, the credit-deposit ratio has continued to improve strongly from the lows of the pandemic despite the rising interest rates (figure 1). A deeper dive reveals that most of the lending is happening in the industry and services sector. This points to improving investment, which means that the supply side is gearing up to meet the rising demand.

(Image Source: India Economic Outlook, July 2023, Deloitte insights,)

Inflation:

India has had better success in taming inflation with relatively lesser policy tightening. The Reserve Bank of India (RBI) intervened in May 2022 and has increased the policy rate six times in 11 months since, increasing the repo rate by 250 bps. The inflation in June 2023 was 4.8%, considerably lower than the last fiscal year

Impact of Interest rate hike by USA

A moderation in the rate hikes by the United States after a spree of rate hikes since February 2022 is a positive news for India. It has reduced the pressures on the RBI to maintain an interest differential needed for the currency carry trade (leveraging the interest-rate arbitrage) and to attract foreign investment (which has declined due to tighter global liquidity conditions).

Forecast of Indian Economic Growth

The first-quarter data points to further building on the positive momentum in the economic data. We continue to remain optimistic about the economy this year and expect India to grow between 6.0% and 6.3% during FY2023–24 in our baseline scenario, followed by 6.6% and 7.2% over the next two years as the global economy turns buoyant

(Source: India Economic Outlook, July 2023, Deloitte insights,)

(Image Source: India Economic Outlook, July 2023, Deloitte insights,)

Despite the recent easing of prices, core prices have not moderated yet. Besides, the risk of El Niño and a below-normal monsoon can bring back the pressure on food prices. We expect the fall in prices to be short-lived as demand picks up along with food prices and the uncertainties around prices remain high (hence, the broad range for forecasts over the next 1.5 years). However, the supply side will probably improve and may help the rebounding economy keep prices under check in the long run (with greater certainties). In any case, we expect inflation to remain in the upper range of the RBI’s inflation target band over the entire forecast period

Government of India Measures/ Incentive for Economic Growth:

The government has been taking steps to make the country a USD 5 trillion economy at an early date," Minister of State for Finance Pankaj Chaudhary said in a written reply to the Upper House. Observing that the outbreak of the COVID pandemic in 2020 and the Russia-Ukraine conflict in 2022 has impacted the world output, increased inflation in several countries and raised uncertainty in the world economy, he said, "lower uncertainty in the global economic outlook will help India become a USD 5 trillion-dollar economy earlier"

Some of the important measures taken by the government in the past to boost economic growth include the making of the National infrastructure pipeline of projects, push to capital expenditure, implementation of the Production Linked Incentive (PLI) scheme, finalization of the National Monetization Pipeline of public sector assets and formulation of National Logistics policy, he said.

Further capital expenditure will be speeded up by PM Gatishakti for integrated planning of infrastructure and synchronized project implementation across all concerned central ministries, departments and state governments.

The other initiatives to boost the economy include enhanced outlay for PM Awas Yojana, the launch of the Aspirational Blocks Programme covering 500 blocks for saturation of essential government services; an increase in agriculture credit target to Rs 20 lakh crore with a focus on animal husbandry, dairy and fisheries;

and setting up of Agriculture Accelerator Fund to encourage agri-startups by young entrepreneurs in rural areas, among others.

The 'effective capital expenditure' of the Centre is budgeted at Rs 13.7 lakh crore (4.5 per cent of GDP) for 2023-24, he said, adding "the newly established Infrastructure Finance Secretariat will oversee the increase in private investment in infrastructure".

In order to improve logistics performance, he said, one hundred critical transport infrastructure projects for last and first-mile connectivity for ports, coal, steel, fertilizer, and food grains sectors have been identified and will be prioritized for development.

Global Seeds Industry

Market Size

The Global Seed Market size is estimated at USD 66.85 billion in 2023, and is expected to reach USD 92.02 billion by 2028, growing at a CAGR of 6.60% during the forecast period (2023-2028).

Hybrid seeds have witnessed high growth, mainly from the major agriculture-producing countries, because of their various benefits, including higher productivity, wider adaptability, and a high degree of resistance to biotic and abiotic stresses. For instance, in cotton, hybrids give 50% more yield than conventional varieties. Their wider adaptability is mainly due to their high buffering capacity to environmental fluctuations.

Globally, Asia-Pacific is the largest agricultural region in terms of production, which holds the major share in the global seed market due to the increase in area under major crops and the increase in seed replacement rate. For instance, the area harvested in cereals increased to 341 million hectares in 2020 from 333 million hectares in 2019.

Market Trends

Hybrids is the largest Breeding Technology. The growing demand for hybrid and open-pollinated seeds from organic growers, animal feed, food, and biofuel industries are driving the market's growth.

New plant breeding techniques are allowing the development of new plant varieties with desired traits by modifying the DNA of the seeds and plant cells. Innovations in plant breeding are helping address the challenges farmers face in the field every day.

Global Market by geography

Globally, Asia-Pacific is the largest agricultural region in terms of production, which holds the major share in the global seed market due to the increase in area under major crops and the increase in seed replacement

rate. For instance, the area harvested in cereals increased to 341 million hectares in 2020 from 333 million hectares in 2019.

North America is one of the world's leading seed-producing regions. The United States is the largest seed market, with corn contributing a major share and accounting for 52.8% of the US seed market in 2021. This is mainly because of the adoption of biotech crops.

Europe is a major producer of forages, with a share value of 32.7% in the global forage seed market in 2021. Major driving factors of the forage seed market include growing demand for feed products and shrinking land for grazing animals.

In Africa, row crops held the largest share, accounting for 79.2% in 2021. The main reason for holding the major share of row crops is the increasing consumption with an increasing acreage under cultivation.

South America's hybrid adoption rate is expected to be more than that of open-pollinated seed varieties from 2022 to 2028 because of an increase in the yield by 10-15%, good quality, and better return on investment. Therefore, hybrid seeds are expected to increase by 38.7% from 2021 to 2028.

The seed market in the Middle East is expected to grow moderately from 2022 to 2028 because of the lower usage of hybrid seeds in the Middle East. The growers are not interested in using transgenic seeds, and to meet domestic demand, they must import about 30-50% of crops from other countries.

Market Trends

The growing population and the availability of rich arable lands and various agro-climatic zones in India represent one of the key factors positively influencing the market. In addition, the commercialization of agriculture and the active collaboration of private and public sectors are propelling the growth of the seed industry in the country. Apart from this, leading seed breeders are increasingly introducing advanced digital technologies to help farmers overcome the negative impacts of pests, climate, and other environmental factors. This, in turn, is contributing to the market growth. Additionally, the integration of data science, artificial intelligence (AI) tools, advanced phenomics, and genomics in the agricultural sector is offering a favorable market outlook. Along with this, various opportunities provided by the Government of India (GoI) to encourage farmers and breeders are creating a positive outlook for the market.

Historic Market data about hybrid seeds industry in India

Key points from some of the published reports regarding Indian hybrid seeds industry are as follows

According to a report of the Standing Committee on Agriculture in 2021, the share of the private sector in India's seed market increased from 57.3% in 2017-18 to 64.5% in 2020-21.

A 2019 report by Indian Council of Food and Agriculture, the Indian seed market reached a value of USD 4.1 billion in 2018 and is expected to grow at a rate of 13.6% from 2019-24, reaching a value of USD 9.1 billion by 2024.

Hybrid seeds occupy about 6% of India's 44 million hectares under rice cultivation.

Hybrid seeds for paddy (rice) are the primary type of hybrid seeds available in India, occupying about 6% of the rice cultivation area.

The majority of India's seed market is occupied by wheat and paddy (rice), accounting for about 85% of the seed market.

Way forward for the Hybrid seeds industry in India

There is a need to Invest in research to develop hybrid seeds that are resilient to varied climates and less susceptible to infections. This ensures a higher yield without compromising on crop diversity.

It is imperative to encourage farmers to continue cultivating traditional and local varieties by providing incentives, technical support, and creating markets for these crops.

There is a need to facilitate partnerships between the government and private sector to encourage the development of hybrid seeds that align with sustainable agriculture practices and local climate conditions.

Brief about the Agriculture and farming Sector

To understand the Indian Seeds industry, one has to take a view of the Indian Agriculture sector and farming process in India.

Indian has different weather condition in different parts of the country and farming is dependent on the season and weather of the region. Soing of seeds in the farm by the farmers is done on seasonal bases Follwing is the details of the crops that are sown in differencnt seasons in western part of india

Monsoon crops

The crops that are sown in the rainy season are called kharif crops. (Also known as the summer or monsoon crop) in India. Kharif crops are usually sown with the beginning of the first rains in July, during the southwest monsoon season. The main monsoon season in India runs from June to September and the southwest summer monsoon occur due to a low-pressure area that's caused by the extreme heat of the Thar Desert and adjoining areas, during summer.

Winter Crops

The crops that are sown in the winter season are called Rabi crops. (Also known as the "winter crop") in India. The Rabi means, when the crop is harvested. Crops that are grown in the winter season, from November to April are called Rabi Crops. Some of the important rabi crops are wheat, barley, peas, gram and mustard. States of north and north eastern part of India such as Punjab and Kashmir and in Pakistan Sindh are important for the production of wheat and other rabi crops. Availability of precipitation during winter months due to the western temperate cyclones helps in the success of these crops.

Summer Crops

Summer crops are those which are grown in the month of March to June. They are grown in places where the water supply is adequate and soil fertility is good. They include Rice, Potato, Maize, Pulses etc.

Thus, as the farming is done on the seasonal bases there is a need to develop agriculture infrastructure to store the seeds and agricultural products in warehouse and cold storage.

* Website Link: <https://www.aau.in/> , <http://www.jau.in/> , <http://www.sdau.edu.in/>

2) Agreements with Farming for Growing Foundation seeds plant

We enter into short term agreements/ understanding with farmers to grow foundation seeds for us in their agriculture land. The foundation seeds are grown by the farmers based on the standard specification mentioned by us. This agreements/ understanding are short term and on mutual understanding to grow foundation seeds

3) Inspecting the Foundation seed plant at the Farm

We have specific team who inspects the growth of the breeder seeds grown in the farms by the farmers. At this stage we reject the undesirable plant to ensure specific quality.

4) Transporting the approved seeds to the Processing facility

Once the final Inspection is completed by the inspection team, the final foundation seed plants are transported to our processing Facility at Ahmedabad.

5) Storing

We have warehouse to store the seeds. We have cold storage warehouse also to store certain seeds which needs temperature-controlled environment to ensure quality of the seeds. The seeds are stored in our warehouse for about 4 to 6 months depending on the seed.

6) Sorting process to remove unwanted particles

The stored seeds are moved to the seed processing machinery from the warehouse to start the process of sorting. In the first stage of processing the seeds in our seed processing unit, we use specific machines to sort weeds from the seeds, Further the Automated colour sorting machine helps to identify colour difference between the good product and the weed seed, thus weed seeds are rejected in this process.

Moving further in the process the seeds pass through a grading machine where in grading of the seeds is done based on the size and weight. An automated machine sorts the seeds based on the size etc. Sorting process helps in removing foreign elements from the seeds and sorts them in specific standards to give uniform production to the farmers.

7) Process of Seed Treatment

We treat the seeds with chemical like insecticides and fungicides to enhance the quality of the seeds. Seed treatment helps in improving the qualitative and quantitative yield to the farmers.

8) Packing

The seeds are packed in bags which have adopted 2-layer packaging, which is moisture resistant, air tight and temper proof to maintain the quality of the seeds. Weight of the packing depends on the type seed for example, the groundnut seeds are packed in bags of 15 kg to 50 kg per bag, whereas the chilly seeds come in packs having 1 kg to 5 kg Bag. Bags are properly weighted and sealed which are now ready to be dispatched.

9) Dispatch of Packed Seeds

Packed Seeds are further Dispatched to the dealer, Distributors based on there orders.

Under Section 31 of the Food Act, no person may carry on any food business except under a license granted by the FSSAI. The Food Act sets forth the requirements for licensing and registering food businesses in addition to laying down the general principles for safety, responsibilities and liabilities of food business operators.

The Enforcement of the Food Act is generally facilitated by ‘state commissioners of food safety’ and other officials at local level.

Under section 51 of the Food Act, any person who manufactures sub-standard food for human consumption is liable to pay a penalty which may extend up to Rs. 5.00 lakh. The Food Act has defined sub-standard food as an article of food which doesn’t meet the specified standards but not so as to render the article of food unsafe.

The provisions of the Food Act require every distributor to be able to identify any food article by its manufacturer, and every seller by its distributor that should be registered under the Food Act and every entity in the sector is bound to initiate recall procedures if it finds that the food marketed by the entity has violated specified standards. Food business operators are required to ensure that persons in their employment do not suffer from infectious or contagious diseases. The Food Act also imposes liabilities upon manufacturers, packers, wholesalers, distributors and sellers requiring them to ensure that inter alia unsafe and misbranded products are not sold or supplied in the market.

In order to address certain specific aspects of the Food Act, the FSSAI has framed several regulations such as the following:

- a) Food Safety and Standards (Contaminants, Toxins and Residues) Regulations, 2011;
- b) Food Safety and Standards (Food Products Standards and Food Additives) Regulations, 2011;
- c) Food Safety and Standards (Licensing and Registration of Food Businesses) Regulation, 2011;
- d) Food Safety and Standards (Packaging and Labelling) Regulations, 2011; and
- e) Food Safety and Standards (Prohibition and Restrictions on Sales) Regulations, 2011.
- f) Food Safety and Standards (Laboratory and sampling analysis) Regulations, 2011.

In addition to the six principal regulations as stated above, notified on 1st August 2011, following new regulations are notified. These include:

- a) Food Safety and Standards (Food or Health Supplements, Nutraceuticals, Foods for Special Dietary Uses, Foods for Special Medical Purpose, Functional Foods and Novel Food) Regulations, 2016
- b) Food Safety and Standards (Food Recall Procedure) Regulation, 2017
- c) Food Safety and Standards (Import) Regulation, 2017
- d) Food Safety and Standards (Approval for Non-Specified Food and Food Ingredients) Regulations, 2017.
- e) Food Safety and Standards (Organic Food) Regulation, 2017.

The Central Government has also framed the Food Safety and Standards Rules, 2011 (the “FSSR”) which have been operative since August 5, 2011. The FSSR provides the procedure for registration and licensing process for food business and lays down detailed standards for various food products. The FSSR also sets out the enforcement structure of ‘commissioner of food safety’, ‘the food safety officer’ and ‘the food analyst’ and procedures of taking extracts, seizure, sampling and analysis.

Essential Commodities Act, 1955

The Essential Commodities Act, 1955 vests Government of India with the authority to issue notifications for controlling the production, supply and distribution of certain essential commodities, which include seeds. The ECA was enacted in 1955, and has since been used by the Government to regulate the production, supply, and distribution of a whole host of commodities that it declares ‘essential’ in order to make them available to consumers at fair prices. Additionally, the government can also fix the minimum support price (MSP) of any packaged product that it declares an “essential commodity”. This act was modified by the Essential Commodities (Amendment) Act, 2020 as part of the 2020 Indian farm reforms. The Amended law allow the Government of India to delist certain commodities as essential, allowing the government to regulate their supply and prices only in cases of war, famine, extraordinary price rises, or natural calamities. The commodities that have been deregulated are food items, including cereals, pulses, potato, onion, seeds, and oils. These can only be regulated in the extraordinary circumstances previously mentioned, by imposing limits on the number of stocks of such items that can be held by persons. The law states that government regulation of stocks will be based on rising prices, and can only be imposed if there is a 100% increase in retail price (in the case of horticultural produce) and a 50% increase in retail price (in the case of non-perishable agricultural food items). These restrictions will not apply to stocks of food held for public distribution in India.

The Prevention of Food Adulteration Act further provides for imprisonment of not less than 6 months which may be extended to 3 years or a fine of Rs 1,000 for contravention of the provisions therein.

Total income:

In fiscal 2022, Revenue from Operations had increased by Rs.1103.17 lakhs or 20.50 %, from Rs.5382.41 lakhs in Fiscal 2021 to Rs.6485.58 lakhs in Fiscal 2022. The increase in the Fiscal 2022 was due to increase in the selling price of the products, as the government increase Minimum Selling Price (MSP) of all the Kharif Products in the Year 2021-22. Major contributor to the increase in sales is due to increase in sale of Groundnut Seeds. The table below shows the Percentage Growth of sale of Groundnut Seed.

Name of Item	F.Y. 2021-22	F.Y. 2020-21	% Increase in Sales
Groundnut seeds	3920.51	1997.26	96.26%

Rational for increase in sale of Groundnut seed

The Government had announced Minimum Selling Price (MSP) of all kharif Products in F.Y.2021-22. Groundnut seed is a Kharif Product. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 (collectively the “UPI Circulars”) in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 and was continue till June 30, 2019. Under this phase, a Retail Individual Applicant would also have the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing would continue to be Three Working Days.

Phase II: This phase will commence upon completion of Phase I i.e with effect from July 01, 2019 and will continue for a period of three months or floating of five main board public issues, whichever is later. Under this phase, submission of the Application Form by a Retail Individual Applicant through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase. This Phase is further extended till March 31, 2020. As per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2 dated March 30, 2020, the UPI Phase II will continue until further notice by SEBI.

Phase III: Subsequently, the time duration from public issue closure to listing would be reduced to be three Working Days under this Phase and the implementation of this phase is yet to be notified by SEBI.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers are to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI mechanism.

While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government.
